## LARGE CAPACITY & HIGH STATIC PRESSURE DUCTEBLE FAN COIL UNITS

# **UTF** Series

Nominal air flows from 1.200 to 14.500m<sup>3</sup>/h

The UTF series air conditioning units are the complete and industrialized solution designed to provide heat and cold to light commercial buildings such as offices, hotels, commercial surfaces and in general medium-sized so-called "light commercial" places with a simple unit. The UTF series units are the innovative solution that meets the needs of modern buildings to obtain the best energy efficiency classes dictated by the European EPBD directive (current directive 2018/844/EU previously identified as 2010/31/EU: EPBD - Energy Performance Building Directive) fully embracing the principle of the "Smart Readiness Indicator" and can allow a wide use of renewable energy sources as expressed by the European directive RES (current directive 2018/2001/EU of the European parliament and of the council of 11 December 2018 on the promotion of the use of energy from renewable sources previously identified as Directive 2009/28/EU of the European Parliament and of the Council of 23 April 2009).
